SHADES

Versatile demi-permanent hair colour!

Use as Toner:

- Allows for toning hair after a full or partial bleach (highlights).
- Quickly and easily neutralises an unwanted tone after full or partial bleaching.

Use as a Booster:

Provides an intense shine on both natural of coloured hair.

Benefits:

1. Use the same shade for different levels.
2. Does not alter the natural colour of the hair.
3. The low concentration of ethanalamine protects the hair and improves the longevity of the colour.
4. The application is simple and fast.

*The client leaves the salon with silky soft and shiny hair.
Satisfaction guaranteed.*

LIQUID TONER

Refreshes, neutralises and adds extra shine and dimension without lightening up the natural hair colour.

Instructions:

After rinsing and towel drying, mix the chosen shade with the specific activator in a ratio of 1:1,5.

Application time: 10-20 minutes depending on the desired result.

For a more subtle softening of the intensity, mix with the Clear Color Booster.

CLEAR COLOR BOOSTER

Liquid hair toner to add shine along with the specific activator. Can also be mixed with the other "Shades Liquid Toners" to soften the colour intensity in a subtle way.

Instructions:

For extra shine: after rinsing and towel drying, mix with the specific activator in a ratio of 1:1,5 and develop for 10 minutes.

To soften the colour intensity of the "Shades Liquid Toners": Mix equal parts with the chosen shade and respect the recommended application time (e.g. 20 g Liquid Toner + 20 g clear Color Booster + 60 g Activator).

ACTIVATOR

Oxidant cream enriched with naturally obtained squalane. Squalane protects, hydrates and regenerates the hydrolipidic film.

Instructions: mix with the "Shades Liquid Toner" in a ratio of 1:1,5. Application time 10-20 minutes depending on the desired result.

Suitable for all hair types.
